Raptor® Emergency Management
For emergency preparation, response, and recovery
Customizable to Your Emergency Protocols
Be confident teachers, staff, and first responders are following your safety response procedures and speaking the same language during an emergency. Raptor is also a mission partner of The "I Love U Guys" Foundation® and is the only provider that offers 100% alignment with their protocols.

Syncs with Your SIS
Ensure you have critical student, staff, and guardian data necessary to accurately account for everyone on campus and reunify students with only approved guardians.

Easily Accessible and User-Friendly
The cloud-based system can be used on any web-enabled device and is designed to work in duress with simple navigation, easy workflows, and an intuitive interface.

Quickly Access Building Maps and Emergency Procedures
Upload, organize, and display building maps, protocol procedures, and emergency operations plans (EOPs) on any web-enabled device. Provide first responders and school personnel 24/7 easy access via the mobile app.

Aligned with Alyssa’s Law
Raptor helps schools comply with "Alyssa’s Law" legislation that requires schools to have silent panic alert systems that link directly to first responder and law enforcement agencies.

Keeps Your Data Safe
Use your Microsoft® Active Directory™ credentials to access any Raptor solution, creating a single point for user authentication and authorization.

Empowers You to Fully Protect Your Schools
Schools can account for students, staff, visitors, volunteers, and contractors in an emergency with the Raptor K-12 integrated safety platform that includes Raptor® Visitor Management, Raptor® Volunteer Management, and Raptor® Emergency Management.

We would highly recommend Raptor to other districts. The idea of multiple integrated security modules indicates the versatility of the system, and we really value the fact that we can rely on one trusted source for all our safety technology.

Laramie County School District, WY
Ensure your schools never miss a drill

Raptor Drill Manager makes scheduling, conducting, and reporting on drills faster and easier for both school and district administrators.

Create and Schedule
District administrators can publish drill requirements in minutes so school administrators can easily schedule drills. Automated notifications remind each school of upcoming drills, and alerts are sent to district administrators to let them know current district or building drill status and notify them if any schools are out of compliance.

Conduct and Manage
Schools can initiate drills directly from any mobile or web-enabled device. Drill progress and completion data is automatically populated in real time within the district dashboard. Additional documentation may be uploaded for comprehensive record keeping.

Track and Report
Highly detailed dashboards allow administrators to scan drill status quickly for every building, drill type, and compliance status. The reporting tab enables administrators to produce complete and accurate status reports for individual schools or for the entire district with the click of a mouse. Reports can then be sent to the district for compliance audits.

Learn and Improve
A key component to optimizing your drill performance is having the proper reporting dashboards to provide crucial insights. Quickly access robust reports to review performance data. This gives you reliable data to see what is working and what areas of your response you may need to improve.

It’s one thing to say you conducted a drill; it’s another to prove it with documentation and to have that documentation at your fingertips.

Duval County Public Schools, FL
Quickly Summon Help
Initiate a response to a school- or district-wide emergency with a tap and swipe on your mobile screen. Raptor Alert has biometric login and intuitive navigation, minimizing your district’s time to alert first responder agencies and expediting real-time coordination.

Instantly Notify Others
Alerts are immediately delivered to a custom list of recipients, which can include administrators, staff members, and first responders. Alerts provide the type, location, time, and who initiated the emergency. Alert content is fully customizable. Alerts can be sent across text message, email, voice call, and push notification.

Call 9-1-1 and Communicate with Real-Time Group Messaging
Connect directly to 9-1-1, first responders, and other personnel and stay in touch with all users—including teachers, staff, district administrators, emergency operations centers, and even local agencies—through real-time group messaging.

Send Alerts Based on Location
Users can switch between campuses and send notifications based on their locations. If a user initiates the panic button and their geolocation is determined to be within the bounds of a specific campus zone, permission-based mass notifications are sent to everyone on that campus. This expedites response time by letting responders know exactly where they are needed and reduces the potential for false alarms. Location data is only accessed during an active emergency.

Get Help for Localized Incidents
Teachers and staff can summon help for everyday localized incidents with Team Assist. Users can quickly send situation-specific details, share their location on an interactive map, communicate with group messaging, and connect with 9-1-1. Districts can customize the list of Team Assist situations, notifications, and alert recipients.

I like several features, with the ability to customize several functions within [Raptor Alert] as being the hands-down best aspect.

Seminole County Public Schools, FL
Gain full visibility within minutes

Raptor Accountability gives you clear, real-time line of sight to the location and status of every student, staff member, and visitor within minutes of an incident initiation.

In past school emergencies, it has taken several hours to confirm the status and location of every student and staff member. Raptor Accountability changes that. Raptor Accountability is 100% aligned with the Standard Response Protocol.

Simultaneous communications and the ability to give multiple incident leaders real-time status reports in an instant . . . plus the accountability: we knew where resources were needed . . . And of course, the command center could see it all.

Brighton Schools, MI

Account for Everyone

Teachers and staff, as well as substitutes and other administrators, confirm the status and location of both themselves and any student by viewing students by roster or searching by name. When using Raptor Visitor Management, you can also account for all visitors, contractors, and volunteers on campus.

Stay Updated in Real Time

Easy-to-read desktop and mobile dashboards update automatically as students, staff, and visitor data comes in. Status is instantly transmitted in real time to the incident commander, giving full visibility of the current location and condition of everyone who is in the building at the time of the incident. The system records a timeline of events for each student for post-incident reporting purposes.

Assist Injured Persons Faster

First responders can see data on all students, staff, and visitors marked injured through the Accountability Dashboard, including information on location, status, medical conditions and allergies, and guardian contact information.
Reunify students with approved guardians 4 times faster

**Raptor Reunification** dramatically increases your speed, accuracy, and efficiency. In timed comparison trials, Raptor Reunification proved 4 times faster than paper-and-pencil reunification methods.

The more time it takes to reunify a student with their parent or guardian, the more likely they are to suffer from traumatic stress, which can trigger reactions like anxiety and behavioral changes that can have a long-term effects on their daily lives.

### Document Every Individual’s Status

Track every individual’s status changes in real time. Your reunification team can see this data for every student, staff, and visitor during reunification. Generate a detailed history of events for each individual for post-incident reporting and debriefing.

### Eliminate Inaccuracy and Reduce Liability

Ensure students are only reunified with approved guardians. Scan a guardian’s ID to check for sex offender status or custodial restrictions. Record approved guardian signature and timestamp data for each reunification.

### Follow Industry Protocols

Raptor Reunification is in 100% alignment with The “I Love U Guys” Foundation Standard Reunification Method™ and dramatically cuts reunification time by replacing handwritten processes with instant mobile communications and record keeping.

### Product Packages

Raptor offers a series of packages to help you protect every child, every school, every day.

After extensive research, we chose Raptor because [Raptor is] the gold standard in school security, as [their] logo says. Raptor solutions really stood out among the competitors.

Toms River Regional School District, NJ

About Us

Raptor Technologies provides a fully integrated, 100% built-in-house school safety management platform that includes Raptor® Visitor Management, Raptor® Emergency Management, and Raptor® Volunteer Management. The platform seamlessly integrates, empowering schools to screen and track visitors, successfully respond to any emergency, and manage volunteers.

We’re a passionate organization driven by continuous improvement in everything we do. We stay on the cutting edge of innovative school safety solutions, and we never lose sight of our mission to protect every child, every school, every day.

Support

We have a team dedicated to helping our clients every step of the way. Raptor customizes implementations and trainings, ensures customer success with ongoing account reviews, and provides live 24/7 technical support and free on-demand resources. Our technical support team answers calls within 13 seconds on average. Our average resolution time is just over 9 minutes.
