**Raptor® Connect™ Integration Platform**

# Improve the flow of critical information and significantly reduce emergency response time.

**RAPTOR®**
TECHNOLOGIES

## Innovative Technology Effortlessly Connects School Safety Devices and Systems

Many schools have independent safety solutions that require separate activation during an emergency. This disjointed process wastes valuable time and ultimately impedes response and recovery. Raptor Connect's advanced technology changes this by:

→ Enabling Raptor to send alerts to other systems

→ Allowing Raptor to receive alerts from other systems

→ Empowering users to initiate multiple emergency response mechanisms from a single point

→ Improving the flow of critical information to significantly reduce response time

**Increase the effectiveness and value of your current and future safety infrastructure**

**Click to Learn How**

### EMERGENCY RESPONSE ACTIVATED
Everything is intertwined when you integrate your alarms, detectors, and other security components with Raptor Connect. Raptor Connect instantly activates the appropriate emergency response (Lockdown, Evacuate, Secure, etc.) in Raptor Alert when it receives emergency signals from your other devices.

### COMMUNITY & SYSTEMS ALERTED
Raptor Connect instantly notifies school staff and first responders while also activating your alarm systems, IoT devices, and access control systems. Raptor Connect also sends information to smart boards and other connected digital response technologies.

### RESPONSE IMPROVED
Raptor Connect streamlines a school's digital emergency response activations, speeding notifications and minimizing the impact of the situation so that you can keep your schools—and everyone inside of them—safe.

RAPTOR® READY

**Working together towards a mission**

**to keep *every* child and *every* school safe *every* day**

## Strong Community of Partners

This ecosystem of school safety leaders covers a wide range of peripherals, including cameras, gun detection, fire/smoke detection, alarms, speakers, IoT devices, smart boards, access control, communication devices, and more. By working together, we empower schools to streamline their emergency response and activation processes.
