RAPTOR®
TECHNOLOGIES
THE GOLD STANDARD IN SCHOOL SAFETY

Raptor®Alert

Expedite the call for help in emergencies and everyday incidents.

What is it?

Raptor Alert gives you the power to expedite help. Designed to work under duress, it includes the latest emergency notification technology, including a silent panic alert system that instantly notifies school staff, administrators, and first responders. The same app is used for critical emergencies and everyday incidents, so staff learns one system to summon help.

How Does it Work?

Automatically send detailed, situation-specific alerts once the panic button is pressed so everyone knows how to respond. Raptor Alert is compatible with all standard Public Safety Answering Point and emergency calling infrastructure and is RapidSOS Ready™, which accelerates the transfer of critical emergency alert data to 911 and first responders. It is configured to your emergency plans so you can be certain everyone has the same information at their fingertips.

> **"Raptor has given us the unique opportunity to save lives by letting us quickly notify authorities and get the right help immediately."**
>
> **-Toms River Regional School District, NJ**

Expedite Emergency Response

- Intuitive User-Friendly Interface

- The Ability to Quickly Initiate a Response

- Activate Other School Safety Technology

- Instantly Notify Others

- RapidSOS Ready™

Quickly Summon Help: Request the right help for any-sized incident—large or small, in a single building or across the entire district—from wherever you are.

Automatically Share Details with Dispatchers: Accelerate the transfer of critical—and accurate—emergency alert data to 911 and first responders. Coupled with RapidSOS, Raptor Alert instantly shares information with dispatchers including caller name and number, precise campus location, and additional information (job title, etc.).

Communicate with Group Messaging: Reduce stress and improve outcomes by staying in touch with all users through real-time group messaging.

Send Alerts Based on Location: If the need to initiate an alert arises, your geolocation within the campus is used to notify the correct individuals to respond. Location data is only accessed during an active emergency.

Integrate School Maps: Raptor integrates with Critical Response Group (CRG). The CRG maps within Raptor combine floor plans, high-resolution imagery, and a gridded overlay. Give first responders and school staff 24/7 access to your maps and emergency protocols.

Follow Industry Protocols: Teachers, staff, and first responders can follow your safety response procedures. Raptor is also 100% aligned with the "I Love U Guys" Foundation.

Sync with Your SIS: Ensure you have critical student, staff, and guardian data.

Meet Compliance: Aligned with Alyssa's Law, Raptor helps schools comply with legislation that requires schools to have silent panic alert systems that link directly to first responder agencies.

Maximize Your Digital Response Technologies: Raptor Connect™ gives you the power to initiate multiple emergency response mechanisms from a single point speeding notifications and improving outcomes.

About Raptor

For 20 years, Raptor has been driven by our mission to protect every child, every school, every day. Used by over 50,000 schools worldwide, Raptor is the gold standard in school safety.

This can't wait.
