

Raptor Badge Alert

One Button. Unmatched Emergency Management Functionality

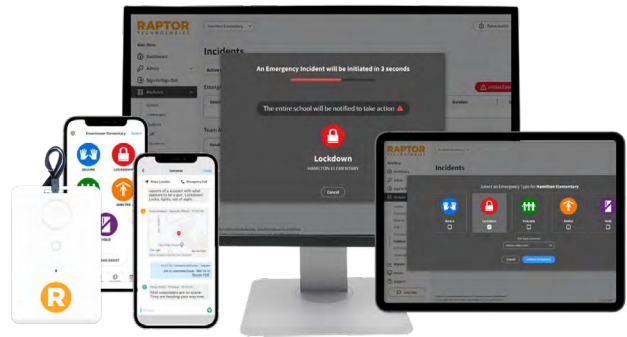

Raptor Badge Alert empowers staff to instantly activate emergency alerts via a wearable badge.

Instant, Reliable Emergency Alerts—Anywhere on Campus

Raptor Badge Alert instantly notifies school staff, district officials, 911, and first responders—even in areas without Wi-Fi or cellular service—using a dedicated Long-Range (LoRa) wireless network. Real-time location tracking and dynamic mapping help responders reach the right location quickly.

Raptor Badge Alert works together with the Raptor Emergency Management suite, including advanced incident mapping, accountability, reunification, and the Raptor Alert App. This multi-layered approach delivers unmatched flexibility, redundancy, and situational awareness—meeting and exceeding state safety mandates like Alyssa's Law.

“When we partnered with Raptor Technologies to pilot their Badge Alert system, we expected it would enhance our emergency response capabilities. What impressed us most was how intuitively our staff adopted the technology from day one. The technology delivers exceptional value for our investment and has become a key part of our daily operations.”

—Joe Taveras, PMP | District Safety & Emergency Operations Coordinator, Liberty Hill ISD, TX

Cost-effective, Multi-layered Alerting on an End-to-end Emergency Management Platform

Deliver Situational Context to Dispatchers

Direct integrations with RapidSOS (and other providers) deliver enhanced communication and data exchange between schools and Public Safety Answering Points (PSAPs).

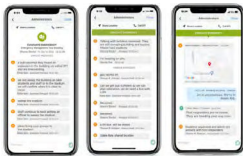

Give First Responders a Clear Path

Dynamic mapping pinpoints the floor-level location of the initiator to efficiently direct first responders.

Maximize Existing Safety Investments

Through Raptor Connect, schools can seamlessly integrate their existing digital security systems (digital signage, alarms, strobes, etc.) to activate simultaneously with an alert.

Provide Connection and Peace of Mind

Secure in-app messaging through Raptor Alert enables ongoing communication between staff and administrators, helping reduce stress and direct resources.

Reunify with Confidence

Account for everyone on campus and reunify families with the built-in Standard Reunification Method workflow officially licensed by The "I Love U Guys" Foundation.

Exceed Compliance and Security Requirements

Raptor Badge Alert meets and exceeds state requirements, including Alyssa's Law. Security-related components, including mapping and gateway hardware, are produced in the U.S.
